...SELF-HELP

Nationally, **Self-Help** is being recognized as an important and integral part of the recovery program for consumers of mental health services. There is a growing acceptance and support among the mental health system and professionals regarding the value and need of peer run self-help groups for consumers. This is a direct result of consumer's representation, participation and perspectives within the mental health system. Simply stated, self-help group participation empowers consumers and embraces the concept of active participation in all facets of a consumer's recovery.

Self-Help Group Definition:

“A self-help group is a gathering of people who have a common bond that voluntarily come together to create and share experiences, reach out and learn from each other in a trusting, supportive, safe and open environment.”

Testimony...

*“When these strangers gathered, something happened –
Some would call it “A dynamic,” others “grace”
- that allowed them to speak truthfully from the
depths of their hearts and also to be receptive to each
other’s truths, where in other circumstances they could
not do either, and,
in this giving and taking, to begin to heal.
What makes this possible and why it is healing
remains the mystery and the miracle of self-help groups.”*

“Notes and Comment”
The New Yorker

Benefits Provided or Obtained Through “SELF-HELP” Participation

COST

- ◆ Self-Help is extremely affordable, because it is free (Occasionally donations are accepted).

SAFETY

- ◆ Self-Help groups provide a safe, confidential environment that assists the individual in developing trust.

CHOICE

- ◆ Self-Help groups provide the opportunity to practice recovery methods with fellow peers. The process is member driven, not agency or system driven. This allows the group members to make decisions, facilitate independence, increase self-reliance and gain back control over their lives. Self-Help is the choice of the individual and may in time decrease the need for professional traditional treatment.

ACCEPTANCE

- ◆ Self-Help groups provide acceptance within a non-stigmatizing and non-judgmental environment.

COPING STRATEGIES

- ◆ Self-Help assists consumers through sharing and increasing their knowledge and application of coping skills.

HOPE

- ◆ Self-Help groups help to eliminate despair by providing consumers the opportunity to share experiences, strength and hope in their recovery efforts.

PEER SUPPORT & ROLE MODELS

- ◆ As peers share with others the recovery tools they have learned, it is with the knowledge and understanding that the one helped today, may be the one to help another tomorrow. Attending a self-help group will offer you the opportunity to be a part of a group in which there are positive role models who have increased their self-awareness and hope of recovery.

SOCIAL BENEFITS:

- ◆ Self-Help groups help to reduce isolation by creating a sense of belonging, by connecting with other people. This will enable an individual to begin to build a social network, and relationships of trust.

EDUCATION & EMPOWERMENT BENEFITS:

- ◆ Participation in a self-help group provides empowerment, in that a person finds as an individual they can make a difference through learning something new. New knowledge, shared within the group is used to make decisions directly affecting their own lives, which can then be applied through advocacy to help themselves and others.
